

# L I D E INDUSTRIES

Lide Industries is engaged in the design and fabrication of competitively priced carbon and stainless steel products for the storage of raw materials for industrial and petrochemical applications, for feed ingredients, for drinking water, and for waste items, both disposable and recyclable. Products produced include tanks, containers, modular bins, and welded silos, and all items are designed and created following API 12F, API 650, API 620, AWWA, FDA, EPA, and UL 142 codes.

Lide Industries can fabricate tanks for large quantities of fabrication work, yet flexible enough to adjust to constantly changing requirements and demands.

We are available to answer questions and to create proposals for your unique production demands. Our policy is to strive to give individual attention to each job and to produce a finished product of the best quality on time.
